BA2 Wind GP Corp.
Application for an Order Permitting the Sharing
of Records not Available to the Public Regarding
the Buffalo Atlee Wind Farm 2

Decision 28602-D01-2023
Proceeding 28602
Application 28602-A001

1 Decision summary

1. In this decision, the Alberta Utilities Commission considers whether to approve an application brought under Section 3 of the *Fair, Efficient and Open Competition Regulation*, by BA2 Wind GP Corp. (BA2 Wind), for the preferential sharing of records that are not available to the public between BA2 Wind, Buffalo Atlee 2 Wind LP (BA2 Wind LP) and URICA Energy Real Time Ltd.

2. As discussed in greater detail below, BA2 Wind established that the sharing of such records is reasonably necessary for it to carry out its business and that the shared records will not be used for any purpose that will not support the fair, efficient and openly competitive operation of the electricity market. On this basis, and noting the support of the Market Surveillance Administrator (MSA), the Commission has granted the application to permit the sharing of records pertaining to the Alberta electricity market under Section 3(3) of the *Fair, Efficient and Open Competition Regulation*.

2 Introduction and procedural background

3. On November 8, 2023, BA2 Wind, as general partner of BA2 Wind LP, filed an application¹ with the AUC pursuant to Section 3 of the *Fair, Efficient and Open Competition Regulation*. The application seeks an order from the Commission permitting the sharing of records not available to the public between BA2 Wind, BA2 Wind LP and URICA. The requested order relates to the Buffalo Atlee Wind Farm 2 (asset ID BFL2), which is located near the hamlet of Jenner and consists of three Siemens-Gamesa SG 5.0-145 turbines, with a total generating capability of 15.6 megawatts. BFL2 also contains an underground collector system, a control building and other related equipment.

4. In its application, BA2 Wind indicated that it has entered into commercial arrangements with URICA, which, among other things, appoint URICA as an agent of BA2 Wind to provide 24-hour real-time dispatch-desk service for operational energy market services and energy restatements for events at BFL2. These arrangements will make it necessary for BA2 Wind, BA2 Wind LP and URICA to share with each other certain records that are not otherwise available to the public, including energy price and volume pairs, and available capability. The agreement between the companies is for services to be provided until the earlier of June 1, 2029, or the termination of the commercial arrangements.

5. The AUC issued a notice of the application on November 29, 2023. In the notice, the Commission advised that the parties granted standing in the proceeding were limited to

¹ Application 28602-A001.

BA2 Wind and the MSA, in accordance with Section 3(5) of the *Fair, Efficient and Open Competition Regulation*.

6. On November 30, 2023, the MSA advised the Commission that it supports the application of BA2 Wind and does not require further evidentiary process.

7. The Commission considers the record for this proceeding closed as of November 30, 2023.

8. The Commission reviewed the entire record in coming to this decision; lack of reference to a matter addressed in evidence or argument does not mean that it was not considered.

3 The Commission's authority to allow record sharing

9. Section 3(1) of the *Fair, Efficient and Open Competition Regulation* establishes that an electricity market participant shall not share records that are not available to the public relating to any past, current or future price and quantity offers made to the power pool or for the provision of ancillary services. Section 3(2) establishes instances where records that are not available to the public may be shared. Section 3(3) allows the Commission to issue an order permitting the sharing of records, stating:

(3) The Commission may, on application by a market participant that is otherwise prohibited from sharing records referred to under subsection (1), issue an order permitting the sharing of those records on any terms and conditions the Commission considers appropriate where the market participant establishes that

- (a) the records will not be used for any purpose that does not support the fair, efficient and openly competitive operation of the electricity market, including the conduct referred to in section 2, and
- (b) the sharing of the records is reasonably necessary for the market participant to carry out its business.

10. Another factor that the Commission considers in making a determination on the sharing of records is market share offer control. Section 5(5) of the *Fair, Efficient and Open Competition Regulation* states that a market participant shall not hold offer control in excess of 30 per cent of the total maximum capability of generating units in Alberta.

11. The Commission is also cognizant of the requirement in Section 6 of the *Electric Utilities Act* that “[m]arket participants are to conduct themselves in a manner that supports the fair, efficient and openly competitive operation of the market.”

4 Submissions of the applicant

4.1 Is the proposed sharing of records reasonably necessary

12. BA2 Wind does not have an internal 24-hour real-time dispatch desk in order to address events at power producers as required by the independent system operator (ISO) rules.

13. URICA provides dispatch-desk service to clients for operational energy market services, ancillary services, dispatch-down services and energy restatements for events at generators as required by the ISO rules and has the necessary expertise and resources to assist BA2 Wind.

14. For this reason, BA2 Wind asserted that the sharing of non-public records relating to BFL2 is reasonably necessary in order for it to carry out its business regarding BFL2. A written representation from a senior officer of BA2 Wind and BA2 Wind LP, attesting to the necessity for the sharing of records with URICA, was filed with the application.

4.2 Fair, efficient and openly competitive operation of the electricity market

15. As part of the application, a written representation from a senior officer of BA2 Wind and BA2 Wind LP was filed indicating that the records subject to preferential information sharing will not be used for any purpose that does not support the fair, efficient and openly competitive operation of the Alberta electricity market, including but not limited to, the conduct referred to in Section 2 of the *Fair, Efficient and Open Competition Regulation*.

16. The senior officer's written representation also identified that BA2 Wind and BA2 Wind LP have formal systems of controls and policies which ensure that the information shared with URICA will be handled appropriately, including adherence to Section 2 of the *Fair, Efficient and Open Competition Regulation*.

17. Additionally, the written representation from the senior officer of BA2 Wind and BA2 Wind LP confirmed that both companies have in place a *Code of Business Conduct and Ethics*, which requires all employees and other persons conducting business on behalf of BA2 Wind and BA2 Wind LP to comply with the law and relevant rules and regulations, including the protection of confidential information.

18. A written representation from a senior officer of URICA was filed with the application, which confirms that any records shared with URICA will not be used for any purpose that does not support the fair, efficient and openly competitive operation of the Alberta electricity market, including but not limited to the conduct referred to in Section 2 of the *Fair, Efficient and Open Competition Regulation*.

19. The senior officer of URICA confirmed that URICA has a formal compliance plan and program in place to safeguard confidential and commercially sensitive information and access to such information, including non-public quantity-offer information and the confidential information of companies with which URICA does business. All of URICA's employees, officers and affiliates are required to acknowledge and comply with the compliance plan and the *Fair, Efficient and Open Competition Regulation*. Access to secured information is strictly controlled and monitored.

4.3 Offer control

20. BA2 Wind advised that the total offer control of BA2 Wind, BA2 Wind LP and affiliated companies is 1.5 per cent, and that the total offer control of URICA is zero per cent, both of which are less than the offer-control limit of 30 per cent, as set out in Section 5(5) of the *Fair, Efficient and Open Competition Regulation*.

5 Commission findings

21. Section 3(3) of the *Fair, Efficient and Open Competition Regulation*, authorizes the Commission to issue an order permitting the sharing of records on any terms and conditions that the Commission considers appropriate, provided that certain requirements are satisfied. For the reasons that follow, the Commission finds that those requirements have been met.

22. The Commission is satisfied that BA2 Wind has demonstrated that (i) the records sharing order is reasonably necessary for BA2 Wind to carry out its business; and (ii) the subject records will not be used for any purpose that does not support the fair, efficient and openly competitive operation of the Alberta electricity market, including the conduct referred to in Section 2 of the *Fair, Efficient and Open Competition Regulation*. The Commission is further satisfied that BA2 Wind, BA2 Wind LP and URICA will conduct themselves in a manner that supports the fair, efficient and openly competitive operation of the market. In making these findings, the Commission has relied on:

- (a) Submissions from BA2 Wind stating that it and BA2 Wind LP do not have an internal 24-hour real-time dispatch desk in order to address events at power producers as required by the ISO rules.
- (b) Written representations from senior officers of BA2 Wind, BA2 Wind LP and URICA confirming that any records subject to preferential information sharing will not be used for any purpose that does not support the fair, efficient and openly competitive operation of the Alberta electricity market and that they will conduct themselves in a manner that supports the operation of the market.
- (c) Written representation from BA2 Wind and BA2 Wind LP confirming that they have formal systems of controls and policies that ensure the information shared with BA2 Wind and BA2 Wind LP will not be used for any purpose that does not support the fair, efficient and openly competitive operation of the Alberta electricity market, including the conduct referred to in Section 2 of the *Fair, Efficient and Open Competition Regulation*. The Commission understands that all employees and others conducting business on behalf of BA2 Wind and BA2 Wind LP are required to comply with these policies.
- (d) Written representations from URICA stating that it has a formal system of controls and policies that ensure the information shared with URICA will not be used for any purpose that does not support the fair, efficient and openly competitive operation of the Alberta electricity market, including the conduct referred to in Section 2 of the *Fair, Efficient and Open Competition Regulation*. The Commission understands that all officers and employees of URICA are required to comply with these policies.

23. The Commission also finds that offer-control figures for all entities involved (both before and after any approval to share records) are less than the offer-control limit of 30 per cent, as set out in Section 5(5) of the *Fair, Efficient and Open Competition Regulation*.

24. Finally, the Commission considers the MSA's support of this application to be a contributing factor in its determination to permit the sharing of records, given the MSA's mandate under Section 39(2)(a)(vi) of the *Alberta Utilities Commission Act*, to survey, investigate or enforce the "arrangements, information sharing and decisions relating to

electricity market participants exchanging or wishing to exchange electric energy and ancillary services or any aspect of those activities.”

25. For all of the above reasons, the Commission is prepared to issue an order allowing BA2 Wind and BA2 Wind LP to share records not available to the public with URICA, subject to the following terms and conditions:

- (a) The order applies to the sharing of non-public price, quantity and availability information, between BA2 Wind, BA2 Wind LP and URICA, pertaining to BFL2, that may relate to BFL2’s participation in the Alberta electricity market, as described in the application.
- (b) BA2 Wind, BA2 Wind LP and URICA must notify the Commission of the termination of the commercial arrangements between BA2 Wind, BA2 Wind LP and URICA as soon as is practicable and within 30 days of the termination of such commercial arrangements.
- (c) BA2 Wind, BA2 Wind LP and URICA must notify the Commission of any material changes to the information and continued applicability of any representations included within this application that may affect the compliance of BA2 Wind, BA2 Wind LP or URICA with the *Fair, Efficient and Open Competition Regulation* as soon as is practicable and within 30 days of the material changes.

26. The order shall be effective from the date of this decision until the earlier of June 1, 2029, or the termination of commercial arrangements between BA2 Wind, BA2 Wind LP and URICA.

6 Order

27. The Commission grants the application, pursuant to the provisions of Section 3 of the *Fair, Efficient and Open Competition Regulation*, for the sharing of records as set out in the following order granted to BA2 Wind GP Corp., Buffalo Atlee 2 Wind LP, and URICA Energy Real Time Ltd., which is a separate disposition in this proceeding:

- (1) Preferential Sharing of Records – Buffalo Atlee Wind Farm 2 –
Order 28602-D02-2023

Dated on December 5, 2023.
